

Covert Operations: Field Tactics & Extraction Methods

Deep Cover Operations

Agents embedded in long-term missions must adhere to the **S-29 Protocol**, which dictates:

- **No digital activity for 90 days post-deployment.**
- **Alias Rotation every 21 days**, with a two-layer backstory pre-approved by the Directorate.
- **Financial Footprint Erasure**, including the creation of false transaction histories through **mirror-wallets** and pre-approved laundering routes.

If compromised, execute "**Shadow Step**", a multi-phase extraction process:

1. **Initiate Disruptor Wave:** Deploy localized **EMP grenades** to erase nearby digital records.
2. **Trigger Persona Collapse:** Access hidden backup alias data via **Vault-17** decryption keys.
3. **Disappear within 6 hours:** Move to a pre-mapped **Phase-Shift Safehouse**, location rotated every 72 hours.
